

clusterbank maintains a virtual ledger of compute resources for the Argonne Leadership Computing Facility (ALCF).

The current default version on ALCF systems is 0.3.2, available in ALCF softenv as +clusterbank-0.3.2 (The latest version of clusterbank is always available as +clusterbank-latest.) Information regarding changes since the 0.2 series can be found in the [notification message](#). Read the [faq](#) to find answers to additional questions regarding cbank 0.3.

A (very rough) draft [walkthrough](#) is available.

And, in hopes of one day having actual useful documentation, a draft [manual](#) is available.
